Provide Guiding Principles

CORPORATE SPONSORSHIP

Principles
 School-business relationships based on sound principles can contribute to high quality education. However, compulsory attendance confers on educators an obligation to protect the welfare of their students and the integrity of the learning environment. Therefore, when working together, schools and businesses must ensure that educational values are not distorted in the process. Positive school-business relationships should be ethical and structured in accordance with the following principles:

1. Students will not be required to directly observe, listen to, or read commercial advertising during school instructional time and/or while attending school district events and activities or participate in activities involving sales incentives or consumption quotas.
2. Corporate involvement must support the goals and objectives of the schools and the district, and must be evaluated by the school/district on a yearly basis.
3. Schools and educators shall hold sponsored and donated materials to the same standard used for the selection and purchase of curriculum materials, equipment and structures as per Board Policy 8.1.0 Acquisition of Equipment.
4. Corporate involvement programs shall not limit the discretion of the schools, teachers, and the school district in the use of sponsored materials.
5. Corporate sponsorship and advertising relationships should be confirmed by a written contract.

- Exemplar: SD22 (similar to SD82, SDB, SD23, SD52)
